Taxes in New Jersey... Approaching the Tipping Point?

August 30, 2016
Chamber of Commerce Southern New Jersey

For more information or to register, click here.

Businesses and residents of New Jersey are no strangers to high taxes. In fact, by most measures, New Jerseyans are more burdened by taxes than any other state in the country. Despite some recent efforts by the Christie Administration and some in the State Legislature, New Jersey remains at the bottom of the list (the worst) of business and personal taxes.
Join our panel of experts as they provide analyses of key taxation policies surrounding the State Income Tax, Corporation Business & Business Personal Property taxes, property taxes, and inheritance/estate taxes, including their recommendations on how to make these taxes more manageable.
This conversation will help attendees realize what steps need to be taken to achieve true "tax fairness" in New Jersey – it's a discussion you won't want to miss.
