

Ambulatory Surgical Centers and Ambulatory Care Facilities

By combining several complimentary practices in one location and sharing the cost of personnel, computers, and space, an ambulatory surgical center or ambulatory care facility can present healthcare providers with an efficient and cost-effective method for delivering services. At the same time, developing and operating a successful center often involves a number of complex and interdependent legal issues, ranging from state licensure requirements to real estate acquisitions to contractual relationships. Armed with knowledge and experience in all applicable fields, we are prepared to assist clients in the formation and operation of a successful ASC or ACF.
