

## Healthcare Employer-Employee Agreements

---

Our experience negotiating and preparing agreements between employers and employees in the healthcare industry is substantial. We are in a position to understand the needs and desires of both parties to the agreement, and are therefore often able to cut through time-consuming and inefficient negotiations. We understand the need for employers to protect their goodwill and other intangible assets, and we craft appropriate restrictive covenants for that purpose. We also implement stock option plans, bonus plans, and other compensation arrangements to attract and retain valuable employees.
