Daniel B. Markind has over 35 years of experience as an airport, real estate, energy, and corporate transactional attorney. During that time, he has represented some of the largest companies in the United States in sophisticated purchase, sale, financing, leasing, zoning and land use, workout and development matters. He also has helped form numerous start-up and smaller entities and has assisted in their growth. Mr. Markind is the former chair of the Current Issues in Title Insurance subcommittee of the American Bar Association.

Mr. Markind recently was named to the ESG Committee (Environmental, Social and Governance) of the Real Estate Section of the New York State Bar Association. He is assisting private companies and public agencies in developing their ESG Guidelines and regularly provides updates on recent events impacting the development of these guidelines.

Daniel is also the former General Counsel of the Philadelphia International Airport. Currently, he serves as outside general counsel and outside specialty counsel to numerous airports both in the Northeast and across the nation. Additionally, he represents companies that are involved in aviation-related activities. Mr. Markind is heavily involved in the rebuilding of our nation's aviation infrastructure. He is working both with state and federal agencies to develop procedures in different states to allow infrastructure redevelopment using a mixture of private, local, state and federal funding. Mr. Markind is recognized as one of the nation's foremost authorities on the relationship of aviation law to energy law.

Over the last 10 years, Mr. Markind has developed a sub-specialty in energy issues, including renewable energy and oil and gas development and leasing. He speaks widely on Marcellus Shale and other mineral extraction and energy issues and has been asked to give testimony on oil and gas issues before the Pennsylvania State Senate. He represents numerous companies and individuals involved in different capacities related to solar and wind energy development, natural gas and oil leasing, production, transmission and waste disposal. He has developed and writes regularly for his energy blog, Marcellus Shale Update, and has recently been tapped by Forbes.com to be a contributor on Marcellus Shale
