Danielle C. Kucera focuses her practice on domestic and foreign patent prosecution and preparation, primarily relating to medical devices (cardiac electrophysiology, neurostimulation, and cataract surgery systems), artificial intelligence/machine learning systems, biotechnology, bioinformatics tools (drug discovery and development), water treatment chemicals, crude oil and refinery processing, gaming systems, payment processing and fraud detection systems, financial and insurance management systems, and wireless communications.

She also has experience conducting freedom-to-operate studies, drafting noninfringement and invalidity opinions, and performing landscape analyses to assist her clients in assessing and managing risk during product development.

Prior to joining Flaster Greenberg, Danielle served as an associate at a full-service AmLaw 200 firm and a boutique intellectual property law firm, both with offices in Philadelphia.

Danielle also has experience as an automation engineer, designing, programming, and testing control systems for various pharmaceutical companies.
