
Medical Staff Bylaws Webinar: Meeting New Medicare Conditions of Participation and Joint Commission Requirements

September 11, 2014

Strafford Publications, Inc.

Complying With CMS Changes and Updating Hospital Governance Documents

This CLE webinar will prepare healthcare counsel to advise and guide healthcare providers and hospitals on ensuring medical staff bylaws comply with Joint Commission standards, Centers for Medicare and Medicaid Services (CMS) conditions of participation, and federal and state law. The panel will also review the impact of healthcare reform on medical staff governance.

Description

Medical staff bylaws map out how a healthcare organization will provide quality patient care. Counsel to healthcare providers must ensure that **bylaws address areas emphasized by the Joint Commission**, including emergency management oversight, privileging, credentialing, appointment, adverse actions, medical executive committee, and documentation.

Moreover, the CMS recently released two final **rules modifying the Medicare Conditions of Participation**. The CMS provided clarification for hospitals within a multi-hospital system and regarding who may be a member of a medical staff.

Counsel must thoroughly review their healthcare provider clients' bylaws, rules and regulations, and **make necessary revisions to ensure compliance** with Joint Commission requirements as well as the CMS' final rules.

Listen as our authoritative panel of healthcare attorneys reviews recent developments, the implications for healthcare providers and medical staff operations, and offers strategies for amending and approving compliant bylaws. The panel will also examine the impact of healthcare reform on medical staff governance.
